There was a time, five hundred years ago, when science was regarded as an art, and art as a science. And in the contest between the senses, the ear, through which we had previously received all knowledge and the word of God, was conquered by the eye, which would henceforth be king. A new breed of painters aimed to reconcile the world of the senses with that of the mind, and their goal was to conceal themselves in the details and vanish away, like God. A new way of perceiving was born.

Anita Albus describes the birth and evolution of trompe-l'oeil painting in oils in the fifteenth, sixteenth, and seventeenth centuries, focusing her attention on works by northern European artists—both major and minor. As a scholar, she stands in the tradition of Panofsky; as a painter, she is able to see things others have not yet perceived; as a storyteller, she skillfully describes abstract notions in a vivid and exciting way. Like the multilayered technique of the Old Masters, her method assumes an ability to distinguish between the different levels, as well as a talent for synthesizing them.

The first part of the book is devoted to the visibility of the invisible in the art of Jan van Eyck—his visual effects, perspective, artistic technique, and philosophy. The second and third parts are taken up with descriptions of the genres of "forest landscape," "still life," and "forest floor." In the midst of butterflies, bumblebees, and dragonflies, Vladimir Nabokov emerges as final witness to the survival in literature of all that was condemned to vanish from the fine arts. After a glimpse into the continuing presence of the past and some conjectures as to the future, the book's final part throws fresh light on the colored grains of the hand-ground pigments that were lost when artists' materials began to be commercially manufactured in the nineteenth century.

**The Art of Arts** is thus both a dazzling cultural history and the story of two explosive inventions: the so-called third dimension of space through perspective, and the shockingly vivid colors of revolutionary oil paints. Albus makes abundantly clear how, taken together, these breakthroughs not only created a new art, but altered forever our perception of the world.

#### **Mildred Kershner:**

As a scholar exactly feel bored to reading. If their teacher questioned them to go to the library in order to make summary for some book, they are complained. Just small students that has reading's heart and soul or real their passion. They just do what the educator want, like asked to the library. They go to there but nothing reading seriously. Any students feel that reading through is not important, boring as well as can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this The Art of Arts: Rediscovering Painting can make you truly feel more interested to read.
