Apheresis: Principles And Practice

Apheresis: Principles And Practice

This book provides a comprehensive account of the scientific, technical and practical aspects of most of the uses thus far found for apheresis instruments. Anyone with a specific question about any area of apheresis should be able to find the answer with this book, either in the references cited or, in most cases, in the text itself.

An eclectic group of contributors have come together to produce Apheresis: Principles and Practices, 2nd edition including engineers and inventors involved in the development of instruments, physicians with expertise in apheresis and the treatment of diseases for which apheresis products or procedures are important therapeutically, nurses and technologists who care for donors and patients during apheresis procedures, and individuals with knowledge of regulatory and managerial issues.

This book is intended for health-care professionals working in any branch of apheresis donation or therapy and should be useful for individuals at all levels in the blood banking and transfusion medicine communities, as well as physicians and other medical professionals who care for patients needing apheresis products or procedures.

Highlights:

Significant updates concerning adverse reactions, particularly those related to citrate and hypocalcemia

Descriptions of new instruments intended for multiple component donations

New material on leukocyte reduction of apheresis platelets

New chapter on bacterial contamination of platelet transfusions

New information regarding the rapidly moving field of agents used to mobilize progenitor cells into the peripheral blood, the procedures that have been developed to collect them and the important issues of potency and tumor cell contamination

New information on dendritic cells

Updates to chapter on strategies using allogeneic donor cells with information provided by both basic and clinical studies

Revisions to information on photopheresis including results of recent clinical studies and a description of a new instrument

Results from the latest gene therapy trials

Updates to the latest concepts and regulatory requirements
