Integrated Computer-Aided Design in Automotive Development: Development Processes, Geometric Fundamentals, Methods of CAD, Knowledge-Based Engineering Data Management Mario Hirz, Wilhelm Dietrich, Anton Gfrerrer, Johann Lang

The automotive industry faces constant pressure to reduce development costs and time while still increasing vehicle quality. To meet this challenge, engineers and researchers in both science and industry are developing effective strategies and flexible tools by enhancing and further integrating powerful, computer-aided design technology. This book provides a valuable overview of the development tools and methods of today and tomorrow. It is targeted not only towards professional project and design engineers, but also to students and to anyone who is interested in state-of-the-art computer-aided development.

The book begins with an overview of automotive development processes and the principles of virtual product development. Focusing on computer-aided design, a comprehensive outline of the fundamentals of geometry representation provides a deeper insight into the mathematical techniques used to describe and model geometrical elements. The book then explores the link between the demands of integrated design processes and efficient data management. Within automotive development, the management of knowledge and engineering data plays a crucial role. Some selected representative applications provide insight into the complex interactions between computer-aided design, knowledge-based engineering and data management and highlight some of the important methods currently emerging in the field.

From reader reviews:

Virginia Villalon:

In this 21st century, people become competitive in every way. By being competitive currently, people have to do something to make these people survive, being in the middle of the crowded place and notice simply by surrounding. One thing that occasionally many people have underestimated the idea for a while is reading. Sure, by reading a e-book your ability to survive enhance then having chance to stay than other is high. For yourself who want to start reading a new book, we give you this Integrated Computer-Aided Design in Automotive Development: Development Processes, Geometric Fundamentals, Methods of CAD, Knowledge-Based Engineering Data Management book as basic and daily reading book. Why, because this book is usually more than just a book.

Marvin Seto:

Spent a free time for you to be fun activity to try and do! A lot of people spent their free time with their family, or their own friends. Usually they carrying out activity like watching television, likely to beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Do you wish to something different to fill your current free time/ holiday? Might be reading a book is usually option to fill your free time/ holiday. The first thing that you ask may be what kinds of guide that you should read. If you want to attempt look for book, may be the guide untitled Integrated Computer-Aided Design in Automotive Development: Development Processes, Geometric Fundamentals, Methods of CAD, Knowledge-Based Engineering Data Management can be excellent book to read. May be it could be best activity to you.

Kenneth Harrell:

Beside this kind of Integrated Computer-Aided Design in Automotive Development: Development Processes, Geometric Fundamentals, Methods of CAD, Knowledge-Based Engineering Data Management in your phone, it can give you a way to get more close to the new knowledge or data. The information and the knowledge you are going to got here is fresh from your oven so don't always be worry if you feel like an aged people live in narrow village. It is good thing to have Integrated Computer-Aided Design in Automotive Development: Development Processes, Geometric Fundamentals, Methods of CAD, Knowledge-Based Engineering Data Management because this book offers to you readable information. Do you sometimes have book but you don't get what it's interesting features of. Oh come on, that will not happen if you have this inside your hand. The Enjoyable arrangement here cannot be questionable, like treasuring beautiful island. So do you still want to miss it? Find this book and also read it from currently!

Maria Green:

Reading a book make you to get more knowledge from it. You can take knowledge and information from a book. Book is created or printed or illustrated from each source which filled update of news. On this modern

era like today, many ways to get information are available for you. From media social just like newspaper, magazines, science reserve, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Are you hip to spend your spare time to spread out your book? Or just in search of the Integrated Computer-Aided Design in Automotive Development: Development Processes, Geometric Fundamentals, Methods of CAD, Knowledge-Based Engineering Data Management when you required it?
