## **Changing Faces** George Tscherny

It's the man on the moon, right? *Keep looking.* Okay -- whoa! -- now it's two lovers moving in for a kiss. *Try another.* This one? It's a bowl of fruit. *Pick it up. Flip it over.* Ah...now it's a guy in a helmet!

As design historian George Tscherny so readily shows in this endlessly engaging book, perception is a fragile and easily manipulated commodity. *Changing Faces* presents an idiosyncratic and humorous collection of paintings, drawings, cartoons, masks, toys, advertisements, and other works of ephemera that -- either by flipping or flopping or just plain staring -- somehow transform the human physiognomy. Here you will find optical illusions from the Renaissance, Enlightenment-era political cartoons, and Victorian toys that all start off as one thing and end up as another. Sometimes these mutations were made for fun (give magnetic hair to a bald man!) sometimes for profit (buy a Studebaker!), and sometimes to score a political point (watch a French king turn into a big fat pear!), but the results are always an intriguing pleasure to watch. Not every book on our list promises an afternoon of pleasant diversion -- architecture is serious business -- but we're confident that after a few moments with this volume even the most jaded readers will -- forgive us! -- find their frowns turned upside down.
