**Sets, Logic and Categories (Springer Undergraduate Mathematics Series)** Peter J. Cameron

Set theory, logic and category theory lie at the foundations of mathematics, and have a dramatic effect on the mathematics that we do, through the Axiom of Choice, Gödel's Theorem, and the Skolem Paradox. But they are also rich mathematical theories in their own right, contributing techniques and results to working mathematicians such as the Compactness Theorem and module categories. The book is aimed at those who know some mathematics and want to know more about its building blocks. Set theory is first treated naively an axiomatic treatment is given after the basics of first-order logic have been introduced. The discussion is supported by a wide range of exercises. The final chapter touches on philosophical issues. The book is supported by a World Wide Web site containing a variety of supplementary material.

### **From reader reviews:**

#### **Robert Thomas:**

Often the book Sets, Logic and Categories (Springer Undergraduate Mathematics Series) has a lot info on it. So when you read this book you can get a lot of advantage. The book was authored by the very famous author. This articles author makes some research prior to write this book. That book very easy to read you can obtain the point easily after reading this book.

#### **Curtis Dugan:**

You could spend your free time to see this book this guide. This Sets, Logic and Categories (Springer Undergraduate Mathematics Series) is simple to create you can read it in the area, in the beach, train and also soon. If you did not include much space to bring typically the printed book, you can buy often the e-book. It is make you better to read it. You can save the book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.

#### **Allan Kean:**

This Sets, Logic and Categories (Springer Undergraduate Mathematics Series) is brand-new way for you who has interest to look for some information because it relief your hunger details. Getting deeper you into it getting knowledge more you know or perhaps you who still having bit of digest in reading this Sets, Logic and Categories (Springer Undergraduate Mathematics Series) can be the light food in your case because the information inside this kind of book is easy to get by means of anyone. These books build itself in the form and that is reachable by anyone, yep I mean in the e-book application form. People who think that in book form make them feel drowsy even dizzy this reserve is the answer. So you cannot find any in reading a reserve especially this one. You can find actually looking for. It should be here for a person. So , don't miss the item! Just read this e-book variety for your better life in addition to knowledge.

#### **Robert Wilkerson:**

What is your hobby? Have you heard that will question when you got scholars? We believe that that concern was given by teacher with their students. Many kinds of hobby, Every person has different hobby. So you know that little person similar to reading or as studying become their hobby. You must know that reading is very important as well as book as to be the matter. Book is important thing to add you knowledge, except your personal teacher or lecturer. You get good news or update concerning something by book. Numerous books that can you go onto be your object. One of them is this Sets, Logic and Categories (Springer Undergraduate Mathematics Series).
