## **Leading Beyond Lean: The Seven Drivers of Productivity** Østbø, Cattermole, Wetherill

Three practicing managers with years of experience improving production facilities around the world explain why lean methodology on its own often fails to deliver productivity gains and how a holistic package incorporating safety, employee development, business planning, capital spending, performance management, quality and lean work can together to deliver results. Improving productivity is the holy grail of every site manager. But while three decades of initiatives from Kaizen through TQM to Lean/Six Sigma have all had an impact, the fact remains that a few companies outperform the others. This is often because individual change initiatives address only one aspect of a much more complex problem. What is needed is a holistic productivity system that addresses every aspect of production. To implement a productivity system in practice, you need more than TQM, more than Lean. Based on their experience managing and improving production facilities around the world the authors show how there are seven key elements that combine to create a sustainable productivity system. *Leading Beyond Lean* explains how these seven elements work together, and how you can set up your own bespoke productivity system, like they did. As practising managers Østbø, Wetherill and Cattermole have used these techniques and procedures to deliver improvements in both in safety and productivity. Helping their sites to become more economically viable, evolving from 'problem sites' with uncertain futures into vibrant sites that attract reinvestment and growth. They become cleaner, safer and better organised, and therefore more attractive places to work in. This book will help any company, any site manager, and any production director understand what is needed to set up a lasting productivity system, not in theory, but in practice – and to deliver outstanding results.

#### **Jessica Hodgkins:**

As a university student exactly feel bored to help reading. If their teacher questioned them to go to the library as well as to make summary for some e-book, they are complained. Just minor students that has reading's spirit or real their hobby. They just do what the educator want, like asked to the library. They go to right now there but nothing reading really. Any students feel that examining is not important, boring in addition to can't see colorful pics on there. Yeah, it is being complicated. Book is very important for you. As we know that on this age, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Leading Beyond Lean: The Seven Drivers of Productivity can make you sense more interested to read.
