Radicals Against Race: Black Activism and Cultural Politics Brian Alleyne

This book interrogates the ideas and practices of the New Beacon Circle's activists as relatively stable elements in the fast-changing scene of contemporary radical politics. Highlighting how biography and self representation have important cultural, theoretical and political implications, Alleyne succeeds in making an original contribution to a growing literature on autobiography as a rich resource for understanding social and political theory. He also provides an engaging account of a neglected area of British Activism. This book will be of interest to social anthropologists, sociologists, and anyone interested in the history of British activism or race and ethnic studies.
