The Large Scale Structures: A Window on the Dark Components of the Universe (Springer Theses)

Stéphane Ili?

Dark Energy and Dark Matter are among the greatest mysteries in modern cosmology. The present work explores in depth how large cosmic structures can help us unveil the nature of these components of the Universe. On the one hand, it focuses on a signature that Dark Energy imprints on the Cosmic Microwave Background through its impact on the time-evolution of gravitational potentials: the integrated Sachs-Wolfe (iSW) effect. Another cosmological background, the Cosmic Infrared Background, is considered for the first time in the study of the iSW effect and demonstrated to be a highly efficient and promising tracer. Changing the perspective on the problem, the use of superstructures for iSW detection is then extensively reviewed: using precise solutions to Einstein's general relativity equations, the full iSW effect is computed, especially due to the cosmic voids predicted by the theory. Using measurements from the most recent data, it is subsequently shown how the iSW probes the solidity of the cosmological standard model. On the topic of Dark Matter, an original study is presented, showing that temperature measurements of the intergalactic medium shed light on the nature of Dark Matter particles, providing the tightest constraints on their decay properties.

From reader reviews:

James Lindberg:

This book untitled The Large Scale Structures: A Window on the Dark Components of the Universe (Springer Theses) to be one of several books which best seller in this year, that is because when you read this e-book you can get a lot of benefit into it. You will easily to buy this specific book in the book retail store or you can order it by using online. The publisher in this book sells the e-book too. It makes you more easily to read this book, as you can read this book in your Mobile phone. So there is no reason for you to past this reserve from your list.

Larry Murray:

A lot of people always spent all their free time to vacation or even go to the outside with them family or their friend. Were you aware? Many a lot of people spent that they free time just watching TV, or maybe playing video games all day long. If you would like try to find a new activity here is look different you can read a new book. It is really fun for you. If you enjoy the book which you read you can spent all day long to reading a e-book. The book The Large Scale Structures: A Window on the Dark Components of the Universe (Springer Theses) it doesn't matter what good to read. There are a lot of individuals who recommended this book. These people were enjoying reading this book. When you did not have enough space to deliver this book you can buy the particular e-book. You can m0ore simply to read this book through your smart phone. The price is not to cover but this book offers high quality.

Elmer August:

Your reading 6th sense will not betray anyone, why because this The Large Scale Structures: A Window on the Dark Components of the Universe (Springer Theses) publication written by well-known writer whose to say well how to make book which might be understand by anyone who also read the book. Written within good manner for you, leaking every ideas and producing skill only for eliminate your hunger then you still question The Large Scale Structures: A Window on the Dark Components of the Universe (Springer Theses) as good book not simply by the cover but also with the content. This is one e-book that can break don't assess book by its cover, so do you still needing one more sixth sense to pick this kind of!? Oh come on your reading sixth sense already told you so why you have to listening to one more sixth sense.

Nathan Osborne:

What is your hobby? Have you heard that will question when you got pupils? We believe that that concern was given by teacher to the students. Many kinds of hobby, Every person has different hobby. And you also know that little person just like reading or as reading through become their hobby. You need to understand that reading is very important and book as to be the thing. Book is important thing to add you knowledge, except your own teacher or lecturer. You discover good news or update concerning something by book. Many kinds of books that can you take to be your object. One of them is actually The Large Scale Structures:

A Window on the Dark Components of the Universe (Springer Theses).
