An Introduction to Statistics: An Active Learning Approach, *Second Edition* by Kieth A. Carlson and Jennifer R. Winquist takes a unique, active approach to teaching and learning introductory statistics that allows students to discover and correct their misunderstandings as chapters progress rather than at their conclusion. Empirically-developed, self-correcting activities reinforce and expand on fundamental concepts, targeting and holding students' attention. Based on contemporary memory research, this learner-centered approach leads to better long-term retention through active engagement while generating explanations.
