Experience the science of fun!

In this new Investigate the Possibilities series for 3rd-6th grades, elementary physics is made easy and fun! This remarkable full-color book is filled with experiments and hands-on activities helping students learn how and why magnets work, different kinds of energy from wind to waves, and concepts from nuclear power to solar energy. Science comes alive as students are guided through simplified key concepts of elementary physics and through hands-on applications.

You will discover:

- What happens to light waves when we see different colors
- How you can see an invisible magnetic field
- The essential parts of an electric circuit
- How solar energy can be changed into electrical energy

Investigate the wonderful world God has made with science that is both exciting and educationally outstanding in this comprehensive series! The main textbook can be combined with the student journal and teacher's guide for a complete educational set. Other books in the series focus on elementary chemistry and physical science.
