Biotechnology of Lignocellulose: Theory and Practice

Hongzhang Chen

Biotechnology of Lignocellulose: Theory and Practice Hongzhang Chen

This book presents and summarizes the new thoughts, new methods and new achievements that have emerged in the biotechnology of lignocellulose in recent years. It proposes new concepts including the primary refining, fractionation, multi-level utilization and selective structural separation of lignocellulose, etc. By approaching lignocellulose as a multi-level resource, biotechnology could have a significant effect on ecological agriculture, bio-energy, the chemical and paper making industries, etc., ultimately establishing distinctive eco-industrial parks for lignocellulose. Additionally, this book provides systematic research methods for the biotechnology of lignocellulose including investigation methods for the primary refining of lignocellulose, for microbial degradation and enzymatic hydrolysis, for cellulose fermentation and for lignocellulose conversion processes. It offers an excellent reference work and guide for scientists engaging in research on lignocellulose. Dr. Hongzhang Chen is a Professor at the Institute of Process Engineering of the Chinese Academy of Sciences, Beijing, China.

From reader reviews:

Eric Graves:

As people who live in often the modest era should be change about what going on or details even knowledge to make these individuals keep up with the era and that is always change and make progress. Some of you maybe will probably update themselves by looking at books. It is a good choice for you personally but the problems coming to a person is you don't know what type you should start with. This Biotechnology of Lignocellulose: Theory and Practice is our recommendation so you keep up with the world. Why, since this book serves what you want and want in this era.

Gloria Lentz:

The actual book Biotechnology of Lignocellulose: Theory and Practice will bring that you the new experience of reading a new book. The author style to clarify the idea is very unique. In the event you try to find new book to read, this book very suitable to you. The book Biotechnology of Lignocellulose: Theory and Practice is much recommended to you to learn. You can also get the e-book from the official web site, so you can quickly to read the book.

David McKenney:

Reading a publication tends to be new life style in this era globalization. With looking at you can get a lot of information that may give you benefit in your life. Using book everyone in this world can share their idea. Ebooks can also inspire a lot of people. A great deal of author can inspire their very own reader with their story or maybe their experience. Not only the storyline that share in the ebooks. But also they write about advantage about something that you need case in point. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that you can get now. The authors in this world always try to improve their ability in writing, they also doing some research before they write to the book. One of them is this Biotechnology of Lignocellulose: Theory and Practice.

Brian Robinson:

Do you really one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Attempt to pick one book that you never know the inside because don't ascertain book by its deal with may doesn't work this is difficult job because you are afraid that the inside maybe not as fantastic as in the outside appearance likes. Maybe you answer may be Biotechnology of Lignocellulose: Theory and Practice why because the wonderful cover that make you consider in regards to the content will not disappoint you. The inside or content is definitely fantastic as the outside or cover. Your reading 6th sense will directly show you to pick up this book.
