## **Robert Oppenheimer: Dark Prince (Makers of Modern Science)** Jack Rummel

The biography series, aimed at young adults, profiles important modern-era scientists. The volumes focus on the lives of those men and women who, in the 19th and 20th centuries, made the greatest contributions to scientific knowledge. Each book looks at a scientist - or group of scientists - whose work had a major impact on a particular field. In simple prose, free of technical jargon, each scientist's achievements are discussed, including the scientific principles underlying his or her work. The human drama of scientific work, conveying the excitement and frustration of research, as well as the exhilaration and rewards of discovery, are also depicted. This volume looks at Robert Oppenheimer, the man who spearheaded the "Manhattan Project" which led to the development of the first atomic bomb. This story of Oppenheimer is instructive in its treatment of this emotive and controversial subject.
