Mid-Latitude Atmospheric Dynamics: A First Course

Jonathan E. Martin

Mid-Latitude Atmospheric Dynamics: A First Course Jonathan E. Martin

This exciting text provides a mathematically rigorous yet accessible textbook that is primarily aimed at atmospheric science majors. Its accessibility is due to the text's emphasis on conceptual understanding.

The first five chapters constitute a companion text to introductory courses covering the dynamics of the mid-latitude atmosphere. The final four chapters constitute a more advanced course, and provide insights into the diagnostic power of the quasi-geostrophic approximation of the equations outlined in the previous chapters, the meso-scale dynamics of the frontal zone, the alternative PV perspective for cyclone interpretation, and the dynamics of the life-cycle of mid-latitude cyclones.

- Written in a clear and accessible style
- Features real weather examples and global case studies
- Each chapter sets out clear learning objectives and tests students' knowledge with concluding questions and answers

A Solutions Manual is also available for this textbook on the Instructor Companion Site www.wiley-europe.com/college/martin.

“...a student-friendly yet rigorous textbook that accomplishes what no other textbook has done before... I highly recommend this textbook. For instructors, this is a great book if they don't have their own class notes – one can teach straight from the book. And for students, this is a great book if they don't take good class notes – one can learn straight from the book. This is a rare attribute of advanced textbooks.”

Bulletin of the American Meteorological Society (BAMS), 2008

From reader reviews:

Ray Ellis:

The book Mid-Latitude Atmospheric Dynamics: A First Course gives you the sense of being enjoy for your spare time. You can utilize to make your capable more increase. Book can for being your best friend when you getting strain or having big problem with your subject. If you can make looking at a book Mid-Latitude Atmospheric Dynamics: A First Course to become your habit, you can get a lot more advantages, like add your own capable, increase your knowledge about a number of or all subjects. You can know everything if you like start and read a guide Mid-Latitude Atmospheric Dynamics: A First Course. Kinds of book are several. It means that, science publication or encyclopedia or some others. So , how do you think about this e-book?

Thomas Ellis:

Reading a publication tends to be new life style on this era globalization. With reading through you can get a lot of information that can give you benefit in your life. Together with book everyone in this world can easily share their idea. Ebooks can also inspire a lot of people. Lots of author can inspire their own reader with their story or maybe their experience. Not only the story that share in the publications. But also they write about the data about something that you need instance. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors nowadays always try to improve their expertise in writing, they also doing some study before they write to the book. One of them is this Mid-Latitude Atmospheric Dynamics: A First Course.

Stephanie Carter:

You may spend your free time to learn this book this book. This Mid-Latitude Atmospheric Dynamics: A First Course is simple to deliver you can read it in the recreation area, in the beach, train and soon. If you did not have much space to bring often the printed book, you can buy often the e-book. It is make you simpler to read it. You can save the book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.

Nicole Powell:

A lot of book has printed but it is different. You can get it by internet on social media. You can choose the best book for you, science, comedian, novel, or whatever by means of searching from it. It is referred to as of book Mid-Latitude Atmospheric Dynamics: A First Course. You'll be able to your knowledge by it. Without making the printed book, it might add your knowledge and make you happier to read. It is most important that, you must aware about guide. It can bring you from one location to other place.
