## **Statistics for Management and Economics** Gerald Keller, Brian Warrack

This best-selling text teaches students how to apply statistics to real business problems through the authors' unique approach. Keller and Warrack teach students a three-step approach to problem solving: to identify the right technique by focusing on the relationship between the problem and the data; to solve the problem by hand calculation, or by using Microsoft Excel or MINITAB™; and to interpret the results. Step-by-step instructions for both Excel and MINITAB are integrated throughout the book. This approach offers maximum flexibility to instructors wishing to teach concepts primarily by hand or with the computer (Excel or MINITAB) or by using both computer and hand calculation methods.
