## Detectors for Particle Radiation Konrad Kleinknecht

This textbook provides a clear, concise and comprehensive review of the physical principles behind the devices used to detect charged particles and gamma rays, and the construction and performance of these many different types of detectors. Detectors for high-energy particles and radiation are used in many areas of science, especially particle physics and nuclear physics experiments, nuclear medicine, cosmic ray measurements, space sciences and geological exploration. This second edition includes all the latest developments in detector technology, including several new chapters covering micro-strip gas chambers, silicon strip detectors and CCDs, scintillating fibers, shower detectors using noble liquid gases, and compensating calorimeters for hadronic showers. This well-illustrated textbook contains examples from the many areas in science in which these detectors are used. It provides both a coursebook for students in physics, and a useful introduction for researchers in other fields.

### **From reader reviews:**

#### **Shawn Martinez:**

This book untitled Detectors for Particle Radiation to be one of several books in which best seller in this year, that is because when you read this book you can get a lot of benefit on it. You will easily to buy this kind of book in the book retail store or you can order it by using online. The publisher of the book sells the e-book too. It makes you quicker to read this book, because you can read this book in your Smart phone. So there is no reason to you personally to past this guide from your list.

#### **Bessie Kraft:**

The guide with title Detectors for Particle Radiation has lot of information that you can understand it. You can get a lot of gain after read this book. This specific book exist new know-how the information that exist in this publication represented the condition of the world today. That is important to yo7u to find out how the improvement of the world. That book will bring you inside new era of the globalization. You can read the e-book on your own smart phone, so you can read it anywhere you want.

#### **Douglas Gibson:**

A lot of people always spent their own free time to vacation or even go to the outside with them family members or their friend. Do you realize? Many a lot of people spent many people free time just watching TV, or even playing video games all day long. If you would like try to find a new activity that is look different you can read a book. It is really fun to suit your needs. If you enjoy the book which you read you can spent all day long to reading a book. The book Detectors for Particle Radiation it is quite good to read. There are a lot of those who recommended this book. These were enjoying reading this book. In the event you did not have enough space bringing this book you can buy often the e-book. You can m0ore simply to read this book through your smart phone. The price is not too costly but this book has high quality.

#### **Justin Mireles:**

Many people spending their moment by playing outside with friends, fun activity together with family or just watching TV all day long. You can have new activity to invest your whole day by looking at a book. Ugh, ya think reading a book can actually hard because you have to take the book everywhere? It all right you can have the e-book, bringing everywhere you want in your Mobile phone. Like Detectors for Particle Radiation which is getting the e-book version. So , why not try out this book? Let's notice.
