Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics)

Gerard Buskes, Arnoud van Rooij

Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics)

Gerard Buskes, Arnoud van Rooij

Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) Gerard Buskes, Arnoud van Rooij

gentle introduction to the subject, leading the reader to understand the notion of what is important in topology with regard to geometry. Divided into three sections - The line and the plane, Metric spaces and Topological spaces -, the book eases the move into higher levels of abstraction. Students are thereby informally assisted in learning new ideas while remaining on familiar territory. The authors do not assume previous knowledge of axiomatic approach or set theory. Similarly, they have restricted the mathematical vocabulary in the book so as to avoid overwhelming the reader, and the concept of convergence is employed to allow students to focus on a central theme while moving to a natural understanding of the notion of topology. The pace of the book is relaxed with gradual acceleration: the first nine sections form a balanced course in metric spaces for undergraduates while also containing ample material for a two-semester graduate course. Finally, the book illustrates the many connections between topology and other subjects, such as analysis and set theory, via the inclusion of "Extras" at the end of each chapter presenting a brief foray outside topology.

From reader reviews:

Mary Logsdon:

Now a day people that Living in the era just where everything reachable by interact with the internet and the resources within it can be true or not call for people to be aware of each details they get. How individuals to be smart in receiving any information nowadays? Of course the answer then is reading a book. Looking at a book can help people out of this uncertainty Information specially this Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) book since this book offers you rich facts and knowledge. Of course the details in this book hundred % guarantees there is no doubt in it you may already know.

Young Legg:

Reading can called mind hangout, why? Because when you find yourself reading a book specifically book entitled Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) your mind will drift away trough every dimension, wandering in every aspect that maybe mysterious for but surely will end up your mind friends. Imaging just about every word written in a e-book then become one web form conclusion and explanation in which maybe you never get just before. The Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) giving you another experience more than blown away your brain but also giving you useful data for your better life within this era. So now let us demonstrate the relaxing pattern this is your body and mind are going to be pleased when you are finished examining it, like winning a sport. Do you want to try this extraordinary investing spare time activity?

Jeffrey Diaz:

This Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) is great book for you because the content and that is full of information for you who all always deal with world and possess to make decision every minute. That book reveal it information accurately using great plan word or we can say no rambling sentences inside. So if you are read this hurriedly you can have whole information in it. Doesn't mean it only provides straight forward sentences but hard core information with wonderful delivering sentences. Having Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) in your hand like having the world in your arm, data in it is not ridiculous a single. We can say that no e-book that offer you world within ten or fifteen second right but this reserve already do that. So , this really is good reading book. Hello Mr. and Mrs. stressful do you still doubt that?

James Chavez:

Beside that Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) in your phone, it might give you a way to get closer to the new knowledge or data. The information and the knowledge you can got here is fresh in the oven so don't become worry if you feel like an old people live in narrow community. It is good thing to have Topological Spaces: From Distance to Neighborhood

(Undergraduate Texts in Mathematics) because this book offers to your account readable information. Do you sometimes have book but you seldom get what it's interesting features of. Oh come on, that will not happen if you have this in the hand. The Enjoyable agreement here cannot be questionable, similar to treasuring beautiful island. Use you still want to miss the item? Find this book and read it from now!
